Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 15-28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
4. For at least claims 15, 22, and 27, the Examiner would consider image data, which is coded by two units such as the first and second coding units, as **the same image data** in the memory unit. The above limitation contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 2624

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 22-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. For at least claim 22, the step of “an executing step of executing image data coding by the first coding unit and image data coding by the second coding unit in parallel” renders claim to be being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention because where the image data come from so that the image data is coded by two coding units; also the limitation of “an image memory unit” which is lack of functionality.

For at least claim 27, the limitations in the last paragraph of this claim renders claim to be being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention because two coding units can not execute in parallel when the switching unit switches connection **either** from the image unit to the first coding unit **or** the second coding unit.

It is noted that two coding units are only executed in parallel when switching unit switches connection from the image unit to both of coding units. However, two coding units are executed in parallel if the connection is established between the memory unit to either the first coding unit or second coding unit then claims 15-28 are subject to rejection and/or election requirement.

Art Unit: 2624

8. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted step is between steps of controlling access and executing. Two steps of an access control step and an executing step are merely independent and not related each other.
